PERSONAL

I am a final-year Agricultural Engineering student at Universitas Padjadjaran. I have finished studies in computer programming and system analysis studies. I've worked on various task related to agricultural technology, and I'm interested in using technology to solve practical problems in agriculture. I enjoy learning new things to help create innovative solutions in the field.

WORKING EXPERIENCE

PT. PUPUK KALIMANTAN TIMUR Calibration Laboratory Analyst Intern	Bontang, Indonesia October 2023 – December 2023
---	--

Performs the calibration process on measuring instruments in the laboratory, which is the process of checking and adjusting the accuracy of the instrument by comparing it with a standard or reference benchmark.

PADJADJARAN UNIVERSITY Engineering Mathematics Teaching Assistant	Sumedang, Indonesia September – December 2022
--	--

As a Teaching Assistant for Engineering Mathematics, I help students grasp core concepts in calculus, linear algebra, and differential equations. I assist with assignments, supervise exams, and provide additional support outside of class to ensure student success.

EDUCATION

PADJADJARAN UNIVERSITY <i>Bachelor of Agricultural Engineer</i>	Sumedang, Indonesia 2020-Present
---	---

BANGKIT ACADEMY – GOOGLE INDONESIA <i>Specialized Machine Learning</i>	Jakarta, Indonesia 2024
--	--

SULTHON AULIA PRIVATE BOARDING HIGH SCHOOL <i>Natural Science Studies</i>	Bekasi, Indonesia 2017-2020
---	--

STATE JUNIOR HIGH SCHOOL 255 EAST JAKARTA	Jakarta, Indonesia 2014-2017
--	---

LICENSES AND CERTIFICATIONS

DICODING INDONESIA Learning Data Analyst with Python Credential ID: JLX14LENJX72	Jakarta, Indonesia Issued October, 2024 Expires October, 2027
---	--

Completed a comprehensive data analysis training covering fundamental concepts, descriptive statistics, data wrangling, exploratory data analysis (EDA), data visualization, and dashboard development using Streamlit.

GOOGLE Crash Course on Python Credential ID: R2P3TPX7860M	Jakarta, Indonesia Issued September, 2024
--	--

Gained proficiency in Python for automation, including writing scripts, understanding data structures (strings, lists, dictionaries), and creating Python objects to automate tasks efficiently.

GOOGLE
Using Python to Interact with the Operating System
Credential ID: Z4GFPJ0XSYD

Set up and configured Python developer environments, manipulated OS files and processes with Python, and utilized regular expressions for text processing. Developed small scripts in both Python and Bash.

Jakarta, Indonesia
Issued September, 2024

ORGANIZATIONAL EXPERIENCE

STUDENT EXECUTIVE BOARD OF FTIP UNPAD
Staff of Research and Data Bureau
Staff of Social and Environment Department
Staff of Environment Department

Sumedang, Indonesia
January – December 2022
January – December 2021
October – December 2020

FTIP MENGABDI
Deputy Field Coordinator

Sumedang, Indonesia
April – October 2022

As the Deputy Field Coordinator, I help plan and execute outreach programs that serve the community. My tasks include organizing logistics, coordinating volunteer efforts, collaborating with local partners, overseeing on-site activities, and ensuring projects meet community needs.

VOLUNTEERING EXPERIENCE

SEKOLAH TANI INDONESIA
Community Volunteer

Sumedang, Indonesia
December 2021 – December 2022

As a Community Agriculture Program Volunteer, I empower local women through sustainable agriculture by teaching planting techniques and organic fertilizer creation. I facilitate consultations with agricultural experts and organize monthly meetings to enhance agricultural knowledge and strengthen community ties.

PROJECTS

REALTIME MONITORING OF LABORATORY WASTEWATER pH
PT Pupuk Kalimantan Timur Project

Bontang, Indonesia
October – December 2023

Due to the company's proximity to marine waters, this project is conducted to measure the compliance of the pH level or acidity of liquid waste discharged through the wastewater drainage system with the applicable regulatory standards.

MODIFICATION OF A DECISION SUPPORT SYSTEM (DSS) PADI DATABASE
SERVICE THROUGH ENHANCEMENT TO THE OPEN SOURCE MYSQL
PLATFORM

Agricultural Engineering Research Project

Sumedang, Indonesia
July 2025 – July 2026

Modified and enhanced the DSS Padi application service by upgrading it to open-source platform to improve efficiency and maintainability. Utilized Python to support the enhancement process, including automating database restructuring, validating data consistency, and optimizing SQL queries.
